

Servo-Drive TSP700

**Highest Dynamics and Precision at 100kHz
3-Level PWM**

The TSP700 series is unique with its 3-Level PWM technology, ensuring high efficiency and ultra-precision in the most demanding motion tasks.

The integrated AC power supply simplifies the connection to AC power.

Spindle motors can be rotated at up to 360'000 rpm, yet at very low losses and best speed stability.

Option Modules are available as for all Triamec Drive products.

Properties

- 100kHz control loop (current & position)
- 3-level PWM power stage
